I made **three major customizations** beyond basic styling:

1. **Custom Color Scheme:**
   I used a soft pink and cream background palette to give the website a warm, creative aesthetic that reflects my personality. Text colors were chosen in matching neutrals for readability and cohesion.
2. **Custom Typography:**
   I combined a modern sans-serif font (Arial) for the body text with a classic serif font (Georgia) for headings, creating a clean yet personal contrast that makes the site easy to read and visually appealing.
3. **Layout & Spacing Adjustments:**
   I customized page margins (max-width: 800px; margin: 40px auto; padding: 0 20px;) and centered the navigation and footer sections to ensure balanced white space and consistent alignment across devices.
